

JIMMY LEE

President, Chief Executive Officer
and Chairman

Mercer International (Nasdaq: MERC)

Mr. Lee is a graduate of Chemical Engineering from the University of British Columbia.

He has been a director since May 1985 and President and Chief Executive Officer since 1992.

Mercer International is a leading company in the production of market NBSK with production facilities in Germany and Canada.

During Mr. Lee's tenure with the Company, the Company acquired the Rosenthal mill, converted the Rosenthal mill to the production of kraft pulp, constructed and started up the Stendal mill and acquired the Celgar mill.

On a consolidated basis, Mercer presently has approximately 1.4 million tonnes per annum of market NBSK pulp capacity.
